

Seed Starting Mix

- 3 parts coir (coco fiber)
- 2 parts perlite
- ¼ parts worm castings
- ¼ parts sifted compost

Makes approximately 5 gallons

For every 5 gallons of mix add

- 1 TBS microbial mix
- 1 cup lime or oyster shells (powder)
- ¼ cup **Sand (optional)**

Potting Soil Mix

- 1 part perlite
- 1 part screened compost
- 2 part coco fiber/coir
- ½ part sand

If no sand is available add additional 1/2 part fiber

Fertilizer/amendment mix

- 4 parts cottonseed meal
- ½ part dolomite lime
- ½ part phosphate rock
- ½ part kelp meal

For every 5 gallons add ½ cup **Fertilizer Mix**
