

What are warm
season plants?

Warm/hot weather plants grow in late spring through early fall when day time temperatures average between 65° to 95°

Cold weather (freezing or even cool temperatures) will shut down the growth of warm season plants!

Warm weather plants LOVE the sun

Warm Season Vegetables

Bean (Lima, Snap), Chayote, Corn,
Cowpea (Southern Pea), Cucumber,
Eggplant, Muskmelon, Okra, Pepper
(Bell, Hot), Pumpkin, Soybean
